MiniBank One: Secure Banking System
MiniBank One is a simple, file-based banking system implemented in a single Python script. It provides core banking functionalities like account creation, login, deposit, withdrawal, fund transfer, and transaction statements. All transaction history is persisted in individual CSV files.
Features
Account Management: Create new accounts with an initial deposit.
Transaction Logging: All transactions (CREDIT/DEBIT) are recorded with a timestamp and description.
Data Persistence: Account balance and history are saved to a dedicated CSV file for each user (database/Statement_<account_no>.csv).
Core Operations: Supports Deposit, Withdrawal, and Transfer between accounts.
Statement View: Users can view their full transaction history directly from the menu.
Installation and Setup
This is a single-file Python project using only standard libraries.
